

Project Name: Kalorin AI

QA Engineer: Naufal Fadhiil
Environment : Staging / Test Environment (Chrome & Mobile View)
Report Date: 28 May 2026
Last Update: 28 May 2026

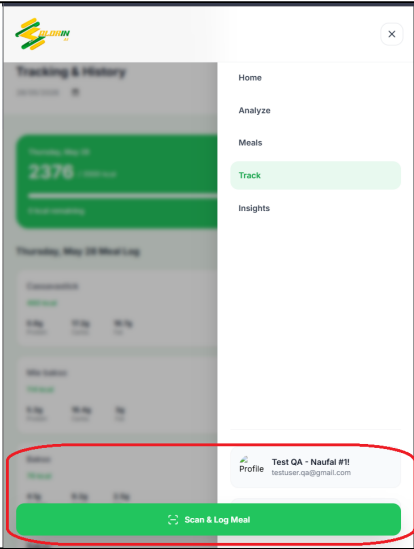

BUG REPORT 1 - Authentication

Field	Description
Bug ID	BUG-001
Title	Username inconsistent after registration
Module	Authentication / Profile
Severity	Major
Priority	Medium
Enviromtment	Chrome/Windows 11
Pre-Conditions	User successfully registered using username with symbols
Steps to Reproduce	1. Register account using username: "Test QA - Naufal #1!" 2. Login to application 3. Open Profile page 4. Check the profile username 5. Navigate to another page
Expected Result	Username remains consistent across all pages
Bug Summary	Username displayed inconsistently between profile page and other pages after registration
Actual Result	Username changes to "USER" on profile page while other pages display different username
Attachment	

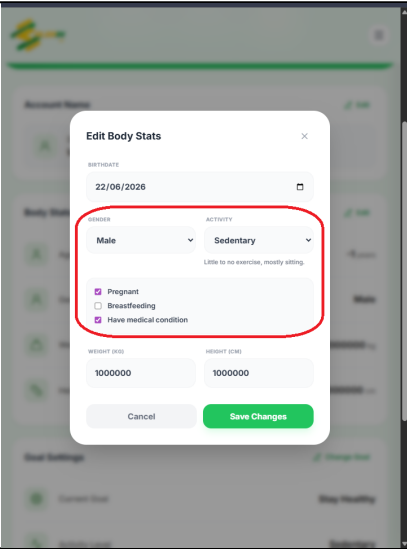

BUG REPORT 2 - Cross Compatible Browser

Field	Description
Bug ID	BUG-002
Title	Navbar not displayed in Chrome browser
Module	Navigation
Severity	Major
Priority	High
Enviromtment	Chrome/Windows 11
Pre-Conditions	User opens application using Chrome
Steps to Reproduce	1. Open application in Chrome browser 2. Login to application 3. Observe navigation bar
Expected Result	Navbar displayed correctly
Bug Summary	Navigation bar does not appear when application is opened using Chrome browser
Actual Result	Navbar is missing in Chrome browser
Attachment (Chrome)	
Attachment (Edge)	

BUG REPORT 3 - UI / Responsiveness Bug

Field	Description
Bug ID	BUG-003
Title	Scan & Log Meal button overlaps profile section on mobile/tablet
Module	Track / Responsive UI
Severity	Minor
Priority	Medium
Enviromtment	Chrome Mobile / Tablet View
Pre-Conditions	User opens sidebar in tablet/mobile resolution
Steps to Reproduce	1. Login to application 2. Open Track page 3. Open sidebar menu in tablet/mobile view
Expected Result	Sidebar content displayed without overlap
Bug Summary	Floating Scan & Log Meal button overlaps sidebar profile section on smaller screen sizes
Actual Result	Scan & Log Meal button overlaps profile section
Attachment	

BUG REPORT 4 - Business Logic

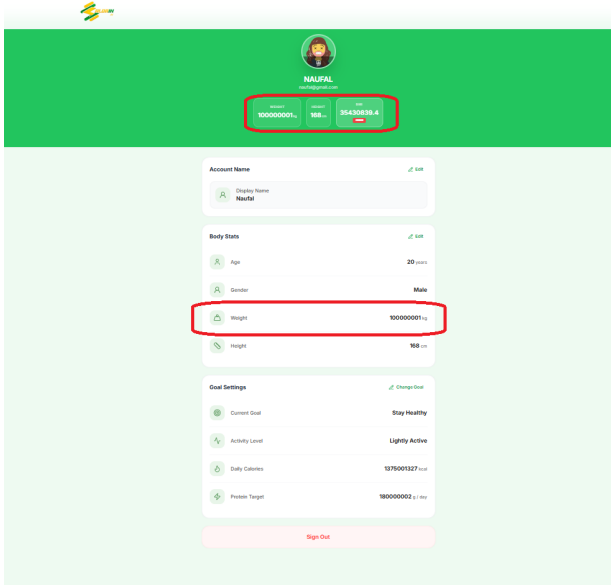

Field	Description
Bug ID	BUG-004
Title	Male user can select pregnant and breastfeeding options
Module	Profile / Onboarding User Data
Severity	Major
Priority	Medium
Enviromtment	Chrome - Windows 11
Pre-Conditions	User selects gender as Male
Steps to Reproduce	1. Login to application 2. Open Profile or Onboarding form 3. Select gender as Male 4. Check pregnant and breastfeeding options
Expected Result	Pregnant and breastfeeding options disabled for male users
Bug Summary	Male users are able to select pregnant and breastfeeding options during onboarding/profile edit
Actual Result	Male users can select pregnant and breastfeeding options
Attachment	

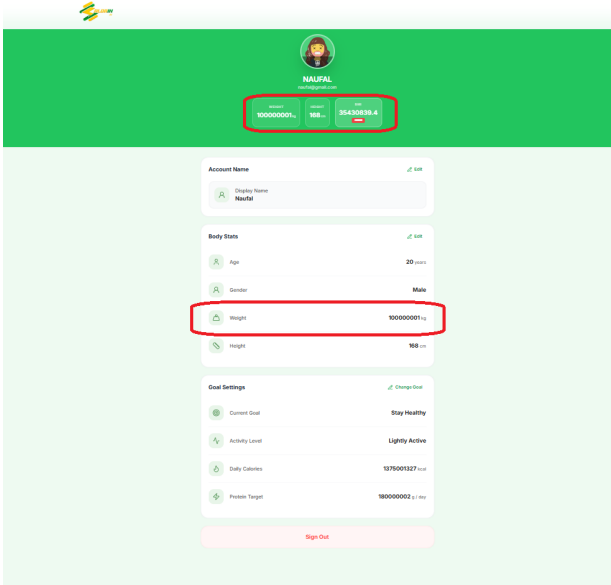

BUG REPORT 5 - Functional Bug (Input validation) / Boundary Value Analysis(BVA) Issue

Field	Description
Bug ID	BUG-005
Title	Weight input accepts unrealistic values
Module	Profile
Severity	Critical
Priority	High
Enviromtment	Chrome - Windows 11
Pre-Conditions	User opens profile body stats edit form

BUG REPORT 6 - Functional Bug (Input validation) / Boundary Value Analysis(BVA) Issue

Field	Description
Bug ID	BUG-006
Title	Height input accepts unrealistic values
Module	Profile
Severity	Critical
Priority	High
Enviromtment	Chrome - Windows 11
Pre-Conditions	User opens profile body stats edit form

Steps to Reproduce	1. Open Profile page 2. Edit body stats 3. Enter weight value such as 9999999 (kg) 4. Save changes
Expected Result	System validates and limits unrealistic weight values
Bug Summary	Weight field accepts extremely unrealistic values without validation
Actual Result	Unrealistic values accepted and BMI calculation becomes invalid
Attachment	

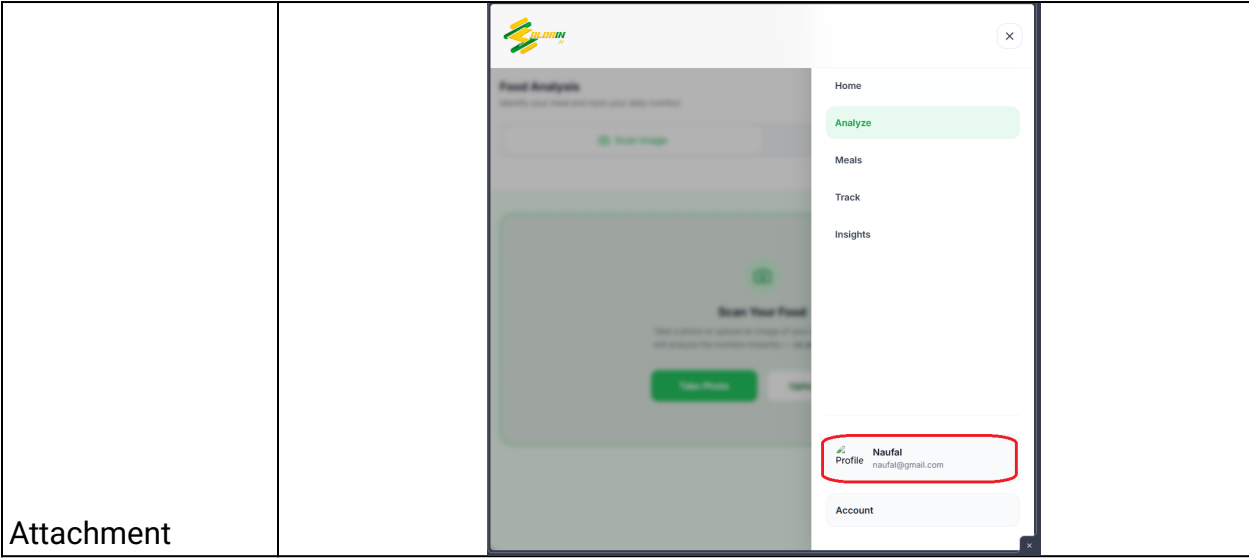

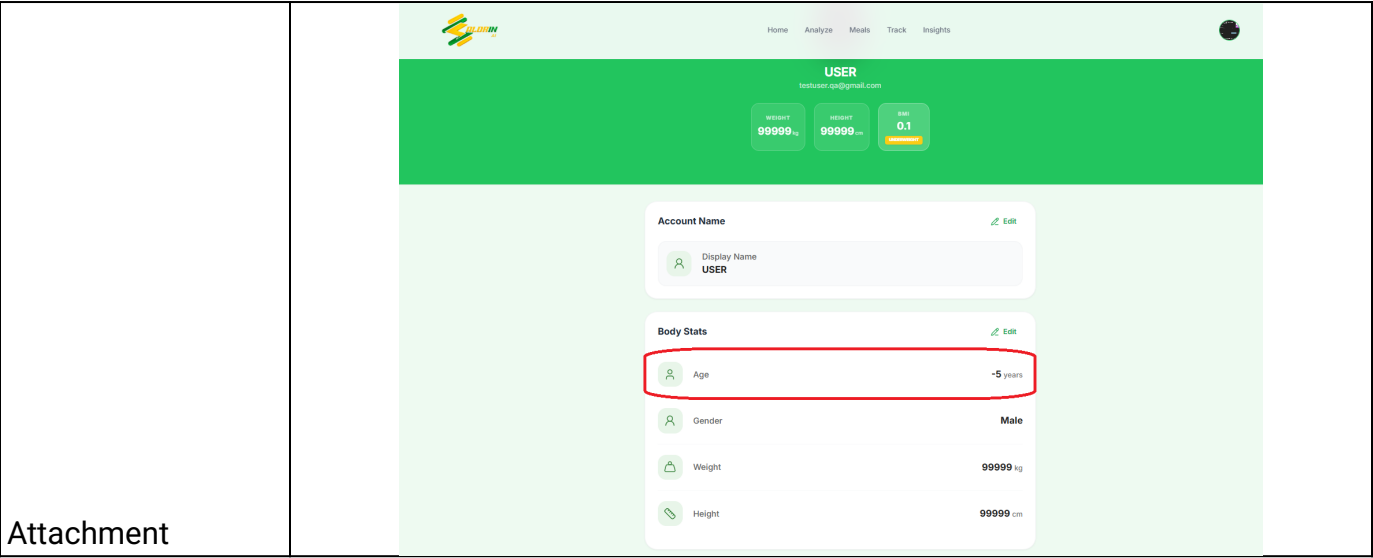

Steps to Reproduce	1. Open Profile page 2. Edit body stats 3. Enter height value such as 9999999 (kg) 4. Save changes
Expected Result	System validates and limits unrealistic height values
Bug Summary	Height field accepts extremely unrealistic values without validation
Actual Result	Unrealistic values accepted and BMI calculation becomes invalid
Attachment	

BUG REPORT 7 - Functional Bug (Input validation) / Boundary Value Analysis(BVA) Issue

Field	Description
Bug ID	BUG-007
Title	Future birthdate generates negative age
Module	Profile / Onboarding
Severity	Critical
Priority	High
Environment	Chrome - Windows 11
Pre-Conditions	User opens body stats form
Steps to Reproduce	1. Open Profile page 2. Edit body stats 3. Select future birthdate 4. Save changes
Expected Result	Future birthdate should be rejected
Bug Summary	System allows future birthdate input causing negative age calculation
Actual Result	Age displayed as negative value

BUG REPORT 8 - UI Inconsistency

Field	Description
Bug ID	BUG-008
Title	Profile image not displayed consistently in sidebar
Module	Profile / Onboarding User Data
Severity	Minor
Priority	Medium
Environment	Chrome - Windows 11
Pre-Conditions	User has uploaded profile image
Steps to Reproduce	1. Login to application 2. Upload/change profile image 3. Open sidebar
Expected Result	Profile image displayed consistently across all sections
Bug Summary	Profile image appears correctly on profile page but sometimes missing in sidebar
Actual Result	Profile image missing in sidebar

BUG REPORT 9 - Error Handling

Field	Description
Bug ID	BUG-009
Title	No proper error handling when internet connection is lost
Module	Global Error Handling
Severity	Minor
Priority	Medium
Enviromtment	Chrome - Windows 11
Pre-Conditions	Application opened normally
Steps to Reproduce	1. Open application 2. Disconnect (wifi) internet connection 3. Refresh browser page
Expected Result	User-friendly error page/message displayed
Bug Summary	Application displays blank white page instead of proper error message when internet connection is lost
Actual Result	Application becomes blank white page

BUG REPORT 10 - Cosmetic Issue

Field	Description
Bug ID	BUG-010
Title	Default browser validation popup used instead of custom validation UI
Module	Form Validation
Severity	Trivial
Priority	Low
Enviromtment	Chrome - Windows 11
Pre-Conditions	User opens registration form
Steps to Reproduce	1. Open registration form 2. Leave required field empty 3. Click Sign Up
Expected Result	Custom validation message styled consistently with application design
Bug Summary	Form validation still uses default browser popup styling instead of custom UI validation
Actual Result	Default browser validation popup appears
